# AUTONOMOUS CONSTRUCTION WORKERS UNION

## **Break out of isolation and join us !**

Construction is a job in which work conditions are especially precarious and work accidents are the norm. In France, 20% of construction workers are undeclared. The other ones are isolated with precarious status (intérim, self-employed, etc.)

Wages are extremely low and non-payments are frequent, especially for undocumented workers.

This is why we want to fight for the regularisation of all undocumented workers, the end of precarious status, safety at work and the end of toxic masculinity on construction sites.

Together, we form each other on the rights linked to our different status (right to withdraw, work accidents, etc.)

We organize to improve our work conditions and our remunerations. We fight against any form of discriminations we live and see at work. We wish to create a place of support and dialogue to talk about what we live, share our difficulties, questions and advices.

If you work in the construction industry with any condition other than boss, come see us every Wednesday from 6:30pm to 8:00pm at 29 Boulevard Longchamp, 13001 Marseille!

Our group is open to anyone working in a construction job : with or without papers, unionized or not !
